

Presentation For

Health And Safety Security Solution

- **Visitor Management**
- **Staff / Tenant Temperature Tracking**
- **Access Control**
- **Crowd Control and Management**
- **And many more...**

Objectives

- ✓ To address the need to offer solutions for the prevention and monitoring the spread of Covid19 using security technology.
- ✓ To use technology that will allow the identification of suspected cases
- ✓ To provide a means of contact tracing
- ✓ Identification and self quarantine solutions
- ✓ Prevention of suspected personnel from entering the office premises.

Visitor Management System

Thermal Screening & Facial Recognition

Visitor Management System

Feature of Visitor Management System

- Get temperature of the visitor and employees/tenants during registration
- Record visitor details into the VMS from the MyKad and Passport
- Record visitor details and temperature into VMS
- If temperature exceed the threshold. Alert security guard and block registration.
- Send alert to manager via Notifier App or SMS.
- Multi site synchronization to other VMS system.

Advantages of Visitor Management System

- Automated Face Recognition and Temperature capture of Visitor and employees/tenants during registration
- Records and Stores visitors & employees details into the VMS Server for Governmental Compliance for up to 6 months
- Digitisation and Easy to search and compile records
- Non-exposure to infection as compared to manual temperature recording
- Better Efficiency with Non-requirement of Guards / HR to capture temperature
- Eliminate Human Error in recording details & temperatures
- Immediate Notification of high temperature visitors and employees.
